

Altrix Hotsoft Overview:

- Altrix Hotsoft is a highly flexible Wifi Hotspot and Voucher Management System.
- As a hotspot solution, it caters for just about any environment and Wifi system you may want to create for your guests.
- The system comprises an onsite router which controls the zero configuration environment and the hosted application service which authenticates user access, manages payments via the secure Netcash portal and controls user sessions
- This Voucher Management System operates along with the internet service of your choice and the internal distribution network at your disposal.

Features:

- Zero configuration: connection not reliant on any configuration
- Online user interface allows you to manage vouchers
- Generate vouchers, check voucher status, run management reports
- Distribute vouchers via printed media, email or SMS
- Allows both prepaid and post-paid vouchers
- Allows both debit order and credit card purchases
